

# Chris & James

Dear Birthmother ,

Thank you for taking the time to learn about us and our excitement for starting a family. After meeting in Medical School 11 years ago, we have been on an incredible journey together. We have been able to support one another while completing our medical degrees and training. We bought a home which we enjoyed making our own along with our two adopted cats- Gizmo and Murphy. We feel very fortunate to have a strong network of family and friends, and two years ago, we were married at one of our favorite places in Maine, surrounded by their immense love and support. Now, we are settled in Massachusetts and are just finishing the process of building a new house. There is nothing in the world we would like more than to become fathers and to create a loving, supportive home for our adopted child.

We appreciate your consideration and would be honored to be the adoptive parents of your child.

With Love,  
Chris and James

# LOVE

Chris and James met while starting UMass Medical School in 2005. It was always clear that we belonged together. Our personalities perfectly complement each other. Chris is someone with an unwavering kind heart who strives for structure which is balanced by James' relaxed, fun loving nature. After graduating medical school and finishing our residency training, we got married in 2014 and are so excited to continue to build their life together.

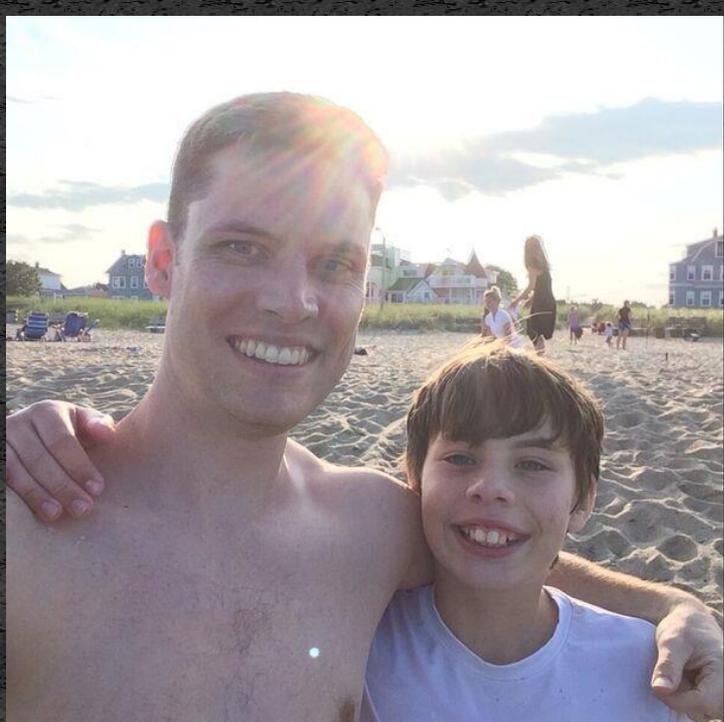

**James** was born and has lived in Massachusetts his whole life. He completed school at Boston University and then a medical degree at UMass Medical School. He has always loved working with children. He was a gymnastics coach, camp counselor, and tutor for inner city youth. He now works as a Child and Adolescent Psychiatrist helping young people and their families recover from mental illness and trauma. James was a competitive gymnast and diver. He spends his free time running, doing yoga, and binge watching his favorite streaming TV shows.

**Chris** was raised in a small suburb north of Boston, Massachusetts. He went to college at Georgetown University and then moved back to Massachusetts to attend UMass Medical School (Where he truly believes fate brought him and James together). He is now a partner in a private OB/GYN practice. He loves discovering new adventures, traveling to explore new places, running, and spending time with family. Trips to visit his nephews in New Jersey and niece and nephew in Florida, as well as playing games with them on the beach in Maine are among his most favorite. He has always dreamed of being a father and can't wait to share his love of Boston sports, the beach, cards, and outdoor fun.

Chris and James are lucky to live close to both of their parents. We love going to the beach in Maine close to where Chris' parents live. We are very close with Chris' brother and his family who live in New Jersey and James' brother and his family who live in Florida. Our niece and three nephews love their time with Uncle James and Uncle Chris. We love holidays and family vacations which are always filled with laughter, fun, and adventure.

Both Chris and James have a passion for travel and seeing new places together. We have friends in many different locations and look forward to planning trips where we all can spend time together. We enjoy being outside playing tennis, skiing, going for a run, or finding a new trail to explore. We are avid New England sports fans and enjoy going to Red Sox and Patriot games each year. At home, we enjoy cuddling up with their two cats, cooking meals, and playing cards and games.

James & Chris are so excited to be building a new house in a small town in Massachusetts where there will be lots of space to explore and create new memories. It is in a small cul-de-sac neighborhood close to great schools, many apple orchards, hiking trails, and a homemade ice cream store.

Thank you for considering us!

~Chris & James
